EXPERIENCE

DesignUps, Nashville, TN — *Front-End Developer*

April 2021 - Current

- Manage website development projects from initial design through completion
- Work closely with programmers and clients to meet project requirements, goals, and desired functionality
- Develop and integrate customized themes into WordPress, and PP

General Assembly, remote — *Software Engineer Fellow*

September 2020 - January 2021

During this 12-week, 500+ hour career accelerator, I produced several full-stack projects, working individually and on a team. Covered front- and back-end programming fundamentals and trained in a variety of modern programming languages and technologies.

Jackalope Brewing Company, Nashville, TN — *Specialty Brewer*

August 2014 - March 2020

- Created from grain to glass all Jackalope's core brand portfolio (about 10 beers) on a state of the art 30 bbl system from Sprinkman
- System troubleshooting (Brewhouse, fermentors, bright tanks, packaging line, chiller, mill)
- Responsible for overseeing the operation of the brewhouse

PROJECTS

Climbing Kings Bluff — *Full-Stack SPA*

- Full-stack SPA application allowing users to track climbing information from a local crag
- Full user authentication that gives the user full CRUD functions
- Tech used: JavaScript, jQuery, HTML, SASS, Express, MongoDB

Music City Heaters — *Website for a 501c3*

- Website to provide information about the group for current and prospective members
- Created a website using React to provide an interactive experience
- Tech used: JavaScript, HTML, SASS
